

PAKISTAN CHAIN MANAGEMENT GROUP

Conveyor Overview

The success of
Pakistan Chain Management Group
is based on more than

25 years
Experience.

Our organization has launched Conveyor Chains, Belts & its Components throughout Pakistan. we only import those products that completely satisfy ISO & other Advance Standards. We always introducing universally acknowledge brands of international market. 1st time in Pakistan we proudly introduce **MAGRIS-Italy**, Which is continuously used in Beverage, Food, Pharmaceutical, Glass, Tire & other Industries.

We are trying to meet customer expectations & respond to their needs as promptly as possible.

We are thoroughly involved in superior customer value, Qualitative Products at economical prices & attractive packing, All supported by excellent customer services.

We believe in establishing long term relations with customer by acquiring, retaining and maximizing consumer satisfaction.

Our continuous expansion in market is the direct result of the service & dedication to customer needs. Our Marketing staff will always be available to provide the required support.

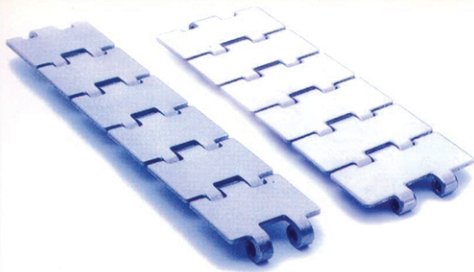

We look forward to receiving any enquiry from your side.

Thanks & Regards

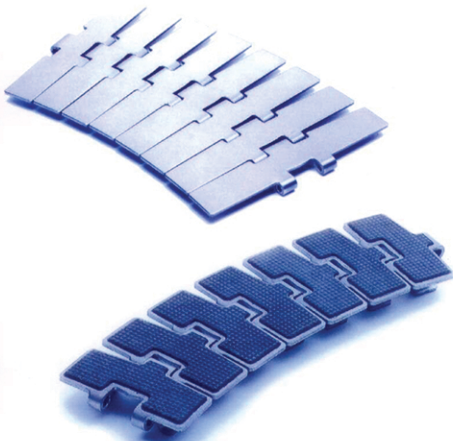

**PAKISTAN CHAIN
MANAGEMENT
GROUP.**

Director

Conveyor chains are produced with high quality stainless steel / plastic materials in order to satisfy the growing needs of new technological progress on the conveying lines.

STAINLESS STEEL CHAINS:-

Pakistan chain management group offers premium quality conveyor chains that can be used in straight, turning, inclined conveyors etc. The material used for these is especially wear resistant. These chains allow tremendous working loads & acquire ultimate tensile strengths. The chain hinges are especially hardened for longer wear life. Steel chains have excellent sliding properties along with improved surface finish. We guarantee, the use of these chains will increase the performance of your conveyor setup & will help to optimize the production.

PLASTIC CHAINS:-

Pakistan chain management group also offers newly developed thermoplastic chains. These chains have lowest coefficient of friction available & is highly wear resistant along with excellent resistant to chain tension. These chains are highly recommended for PET applications and have also been approved by FDA (Food & drug administration) for direct contact with food.. These chains allow high working loads and are also recommended for high speed applications. These chains are mainly used in PET, Tetra packs & pharmaceutical plants.

CONVEYOR BELTS:-

Pakistan chain management group proudly offers plastic conveyor belts, surely a right answer to most sophisticated conveying needs in today's world. The belts are available in different designs & acquire low frictional materials and are also approved by FDA for direct contact with food, meat & other food products.

These belts are able to carry very high working loads that's why also applicable for conveying heavy items such as luggage bags, tires & even heavier items.

These innovative belts are available in both straight & side flex models.

These are mainly used in industries such as Beverage, tire, Pharmaceutical etc. Truly speaking these belts are applicable to almost every application.

COMPONENTS

Pakistan chain management group provides state of the art conveyor components. The use of these quality components will ensure efficient performance of your conveying setup. These are made of high quality polyamide, brass, and stainless etc materials so that product handling can be improved. It includes wearstrips, sprockets, side guide tracks, turning profiles, leveling components side brackets, Finger Transfers etc.
